1 Proportion of household heads born in the ward	8
2 Percentage (%) estimates of the Poverty Probability Index (PPI) for households	9
3 Water treatment in the dry season at village level (%)	14
4 Main water source in the dry season at village level (%)	16
5 Sanitation facilities at village level (%)	17
6 Handwashing at village level (%)	18
7 Asset ownership at village level (%)	20
8 Access rights, security, and decision making around fisheries resources at village level (%)	26
9 Awareness and acceptance of fish reserves at village level (%)	27
10 Group membership of fishers at village level (%)	34
11 Group membership of fishers at village level (%)	38
12 Group membership of fish processors at village level (%)	42

List of Figures

1 Map of lake Tanganyika with sample sizes from each locations	7
2 Population pyramid	7
3 Self-assessment of the ability to meet daily needs at village level	11
4 Type of fishing boats used at village level	12
5 Relative importance of different species at village level	13
6 Main type of water treatment in the dry season	14
7 Main source of water in the dry season	15
8 Household item ownership	20
9 Proportion of households that borrowed money in the last year at village level	22
10 Purpose of the loan	23
11 Source of loans	23
12 Reason for not having borrowed any money in the previous year	24
13 Household membership of a COCOBA, SACCO, or FICO at village level (%)	25
14 Mobile phone usage for financial transactions at village level (%)	25
15 Self-assessment of fisheries resource management over the past five years	26
16 At the moment, do you think the current number of fish in the lake is sufficient to meet the fishing, food, and livelihood needs of the community?	28
17 In the future, do you think there will be sufficient fish for the communities	29
18 Type of fishing gear used at village level (%)	29
19 Seasonal targeting of fish species over the past five years	30
20 Highest sale prices (TSh) of fish species over the past five years	31
21 Lowest sale prices (TSh) of fish species over the past five years	31
22 Satisfaction levels of fishers	32
23 Do you think BMUs are helpful to improving your fishing practices?	34
24 Do you think your current activities are likely to support your needs over the long term (next 5 - 10 years) ?	35
25 Seasonal trading of fish species over the past five years	36
26 Highest sale prices (TSh) of fish species over the past five years for fish traders	36
27 Highest sale prices (TSh) of fish species over the past five years for fish traders	37
28 Satisfaction of fish traders	37
29 Do you think your current trading activities are likely to support your needs over the long term (next 5 - 10 years) ?	39
30 Seasonal processing of fish species over the past five years	40
31 Highest sale prices (TSh) of fish species over the past five years for fish processors	40
32 Highest sale prices (TSh) of fish species over the past five years for fish processors	41
33 Satisfaction of fish traders	41

Summary

Provide broad overview of key findings

Introduction

Intro text...

General Household Information

Household sample sizes across villages along the lake Tanganyika shoreline.

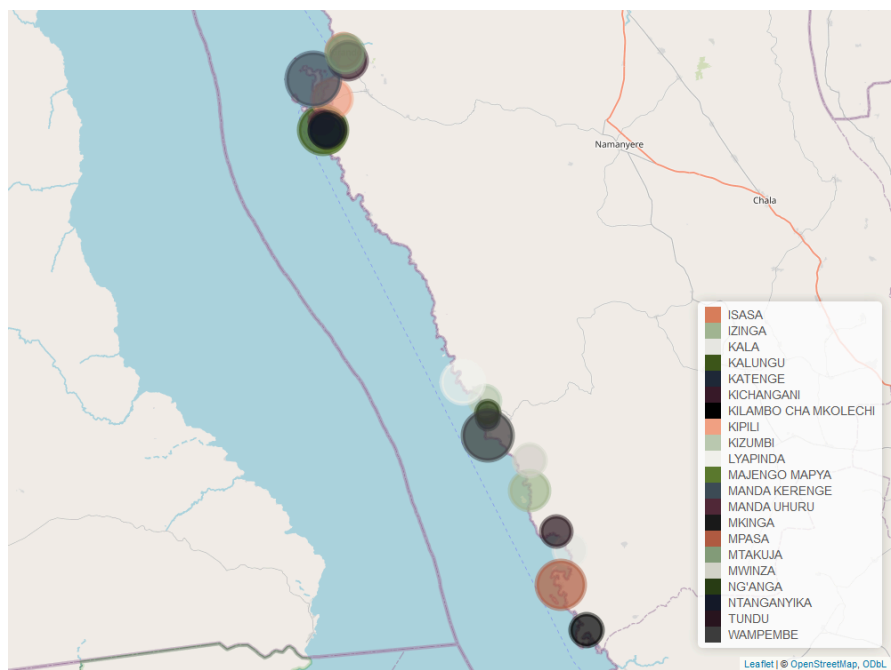

Figure 1: Map of lake Tanganyika with sample sizes from each locations

Population Pyramid

Figure 2: Population pyramid

Table 1: Proportion of household heads born in the ward

Village	Yes	No	Average years spent if not born
ISASA	56.4%	43.6%	18.5
IZINGA	18.2%	81.8%	26.4
KALA	10.5%	89.5%	21.0
KALUNGU	48.3%	51.7%	18.2
KATENGE	53.3%	46.7%	25.4
KICHANGANI	57.8%	42.2%	22.0
KILAMBO CHA MKOLECHI	31.6%	68.4%	18.2
KIPILI	25%	75%	26.9
KIZUMBI	22.6%	77.4%	21.4
LYAPINDA	38.5%	61.5%	22.9
MAJENGO MAPYA	13.8%	86.2%	6.5
MANDA KERENGE	28.7%	71.3%	20.5
MANDA UHURU	10.5%	89.5%	28.5
MKINGA	30.6%	69.4%	22.9
MPASA	19.5%	80.5%	23.1
MTAKUJA	32.7%	67.3%	31.5
MWINZA	12.8%	87.2%	27.6
NG'ANGA	16.7%	83.3%	29.7
NTANGANYIKA	36.1%	63.9%	20.5
TUNDU	25%	75%	19.6
WAMPEMBE	18.6%	81.4%	19.7

Poverty Probability Index

Table 2: Percentage (%) estimates of the Poverty Probability Index (PPI) for households

Category	Upper National Poverty Line	Lower National Poverty Line	Extreme Poverty Line
Overall	63.6	58.2	25.6
Male	65.7	60.1	26.5
Female	56.3	52.1	22.4
Youth	61.5	55.7	22.8

Quantitative Analysis

Livelihoods

Household welfare self-assessment

Figure 3: Self-assessment of the ability to meet daily needs at village level

Fishing

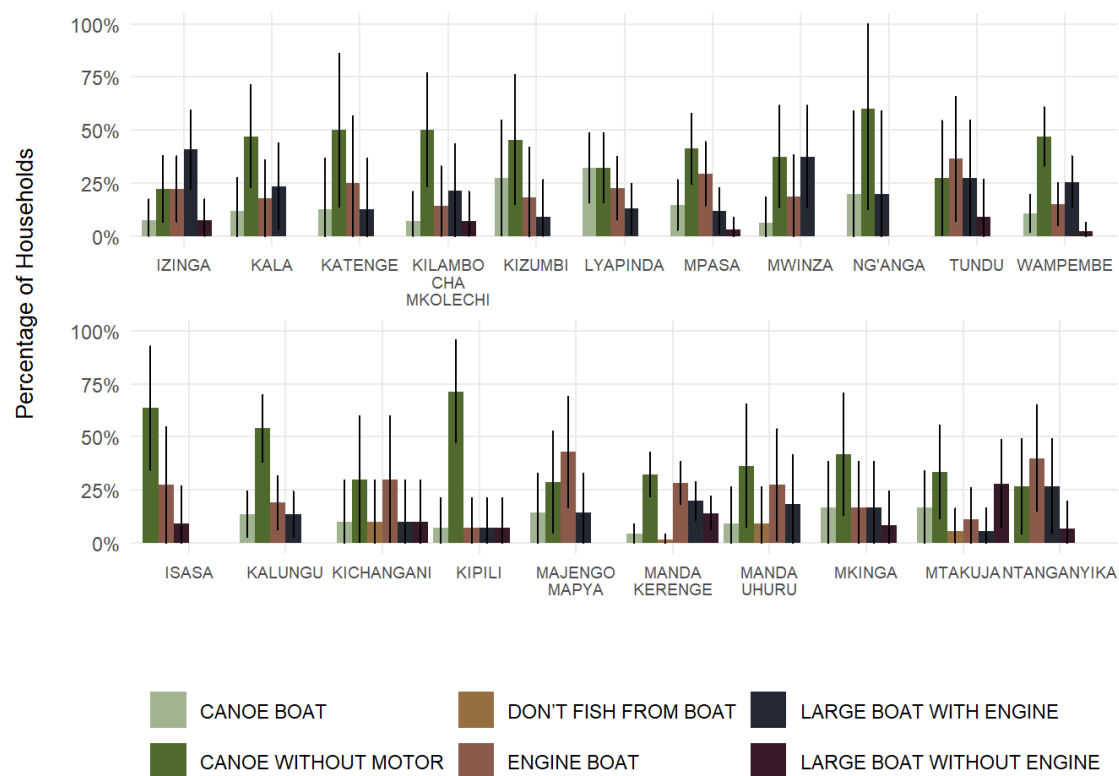

Figure 4: Type of fishing boats used at village level

Relative importance of different species at village level

Figure 5: Relative importance of different species at village level

Living Conditions, Housing, and Energy Use

Water Use

Figure 6: Main type of water treatment in the dry season

Table 3: Water treatment in the dry season at village level (%)

Village	Add Bleach or Chlorine	Boil	Strain Through a Cloth	Use Water Filter	Let it Stand and Settle
ISASA	62.9%	34.3%	2.9%
